

H2O Night with the Stars !!

When: February 16th from 6:00 pm to 8:00 pm

Where: Laberee Land

1371 Stokes Road, Medford

Cost: No cost this month, but we are asking each student to bring an appetizer or dessert to share with the gang.

Bernie Hosko, astronomer with the Willingboro Astronomy Society, will take us on a tour of the night time sky without ever leaving the back porch of the Laberee home.

We will have a laptop that will first show us what can be viewed from our area in February. This could include: Orion, Taurus, Canis Major, Canis Minor, Gemini, Percius, Andromeda and Pegasus. WOW.

Then with a laser pointer, Mr. Hosko will show us where to look for these using our bare eyes or binoculars (yes, be sure to bring a pair!!). Finally, we will view them through one of the most sophisticated scopes available to mere mortals!

Don't worry about the cold. You can just step 2 yards to the inside and get warmed by the fire if you feel chilled.

To get primed for our "Night with the Stars", click on this:
